DM.

DM · DIEMEI LIGHTING

# Light, made for a place.

Founded in 2000, DM connects lighting design with manufacturing craftsmanship, with quality and care at its core. Approximately 30,000 m² of production space supports the development and manufacture of bespoke lighting and project collections.

## Lighting Design & Smart Integration

DM's professional lighting designers consider decorative luminaires alongside downlights, spotlights and other architectural lighting. From luminaire placement and the quality of light to control methods, we provide lighting design services for hotels, private residences and commercial spaces.

## Overseas On-site Support

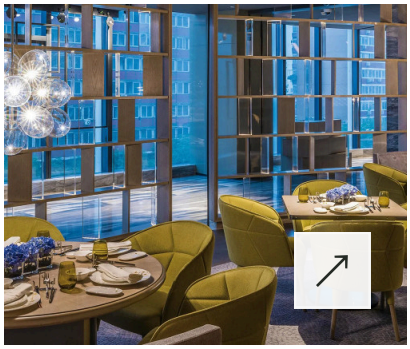

For overseas projects, DM can arrange for engineers to provide on-site installation guidance, drawing checks and technical coordination. Working with local construction teams, they support the process from the arrival of the luminaires through to installation.

SELECTED PROJECTS

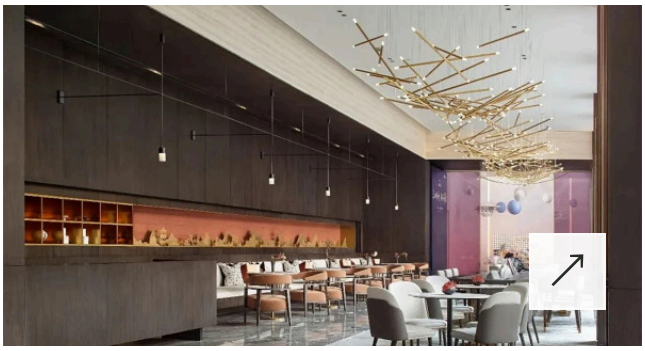

## Foshan Peninsula 01

Foshan, China

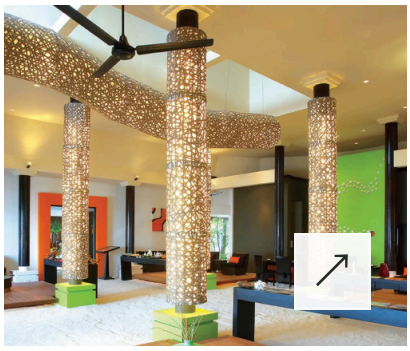

## InterContinental Beijing Sanlitun 02

Beijing, China

## Guomao Phoenix, Fuzhou 03

Fuzhou, China

## Angsana Velavaru 04

Maldives

Certification requirements depend on the product configuration and destination market. We can coordinate project-specific testing and certification, with scope, cost and timing agreed before production.
